

Sipromac 450A

Sipromac single chamber vacuum sealers are long lasting, low-foot print machines for medium to large-scale production. They are suitable for those bigger items that need to be reliably sealed.

Single chamber vacuum sealers are easy to use and easy to clean machines that have castors for convenient relocation. The size and capabilities of these vacuum sealers are fitting for large restaurants, production kitchens or for manufacturing purposes.

The Sipromac 450A is made from stainless steel, features a Busch 40m³/h (2.0 hp) pump, (2) 19.1" seal bars, and a digital control panel that can store up to 20 different programs.

Specifications:

- Stainless Steel Construction
- Stainless Steel lid
- Machine dimensions: 30.5" x 32" x 44"
- Chamber height: 8"
- Seal bar length: (2) 19.1"
- Distance between bars: 23.0" (584 mm)
- Element: twin seal
- Vacuum Pump Busch 40m³ / 2.0 hp
- Electricity 208-220V/3Ph/60Hz
- Electricity: No cable and plug, requires electrician
- Microprocessor MC-40
- Vacuum Sensor - vacuum level controlled in percentage directly with Microprocessor
- Insert plates for sealing height adjustment
- Silencer - noise reducing of the vacuum aeration
- Wheels
- 1 Year Manufacturer's Warranty

Options:

- Electric cut-off
- Modified atmosphere packaging
- Air regulator
- Soft air function
- Stainless steel tilted insert
- Vacuum Pump: Busch 63 m³
- Electricity: Various other voltages and/or single-phase power
