

CBS-880 Band Sealer

When impulse sealing can't keep up with your production, band sealers are a great way to upgrade into an automated process.

These durable, stainless-steel machines are easy to operate with minimal training required. The fast warm-up time allows sealing for a variety of materials. The CBS-880 is an entry-level band sealer that allows for embossed date/lot coders.

Specifications:

- Durable stainless steel
- Easy to operate - minimal operator training
- Fast warm up time
- Solid state temperature controller to maintain seal bars at proper temperature for consistent seal quality
- Fully adjustable conveyor
- Motorized rubber conveyor for speed control
- Knurled pressure rolls with variable pressure adjustment
- Sealing method - constant/direct heat accompanied with a pair each of cooling and heating blocks
- Unit feeds left to right
- Equipped with an emergency stop button

Options:

- Stainless steel stand for horizontal models
- Embossed date lot coder
- Digital counter to keep track of sealed packages
